## Appendix B

### Equipment Special Requirements:

The following requirements are in place for the use of SCIP funds for the purchase of body armor, body-worn cameras, police cruisers, and radios:

#### Body Armor

Per BJA funds may be used to purchase body armor at any threat level designation, make, or model from any distributor or manufacturer, as long as the body armor has been tested and found to comply with the latest applicable National Institute of Justice (NIJ) ballistic or stab standards, which can be found online at <https://www.nij.gov/topics/technology/body-armor/Pages/standards.aspx>.

Further, body armor or armor vests must also be “uniquely fitted vests” as this term is used in the context of the BVP Program (see 34 U.S.C. 10202(c)(1)(1)) requiring that grantees using JAG funds to purchase armor vests or body armor that comply with requirements established for BVP grants. For these purposes, “uniquely fitted vests” means protective (ballistic or stab-resistant) armor vests that conform to the individual wearer to provide the best possible fit and coverage, through a combination of:

- (1) correctly sized panels and carrier, determined through appropriate measurement and
- (2) properly adjusted straps, harnesses, fasteners, flaps, or other adjustable features.

In addition, body armor purchased must be made in the United States.

Agencies seeking funding for body armor are required to have a written “mandatory wear” policy in effect. Per BJA, there are no requirements regarding the nature of the policy other than it being a mandatory wear policy for all uniformed officers while on duty. Subrecipients of funding for body armor must supply the State Administering Agency (Missouri Department of Public Safety) with a copy of such policy at the time of acceptance of the subaward. It is not necessary to supply a copy at the time of application.

#### Body-Worn Cameras

Per BJA, agencies seeking funding for body-worn cameras (BWCs) must have policies and procedures in place related to equipment usage, data storage and access, privacy considerations, and training. Subrecipients of funding for BWCs must supply the State Administering Agency (Missouri Department of Public Safety) with a copy of such policy(s) and procedure(s) at the time of acceptance of the subaward.

BJA released the BWC Toolkit (<https://www.bja.gov/bwc/>) to share model BWC policies and best practices to assist departments in implementing BWC programs.

#### Radios (Portables/Handhelds, Mobiles, Repeaters, Base Stations, etc.)

Digital mobile radios compliant with APCO Project 25 (P25) specifications embody certain fundamental advantages, including interoperability. The term interoperability refers to radio equipment in compliance with P25 specifications, regardless of the manufacturer, that allows users to be "interoperable" with each other.

All equipment must meet all mandatory regulatory and/or DPS adopted standards to be eligible for purchase using grant funds. In addition, subrecipients will be responsible for obtaining and maintaining all necessary certifications and licenses for the requested equipment. Investments in emergency communications systems and equipment must meet applicable SAFECOM guidance. All radios must be P25 compliant and on the Missouri State Interoperability Network (MOSWIN) system. The Missouri Interoperability Center will review all communications equipment applications to ensure they comply with the Digital Radio Requirements for Department of Public Safety Grants. **Equipment that does not meet these guidelines will not be eligible for funding.**

Applicant agencies applying for grant funds for MOSWIN radios should be aware that dual-band (multi-band or all-band) radios (VHF/700/800 MHz) are the best opportunity for local agencies to harness the coverage and capacity being implemented by the State in the MOSWIN. System users must have a dual-band (VHF/700/800 MHz) mobile radio, installed to the manufacturer's recommended specifications, to obtain optimum benefit from system enhancement. VHF band radios are not compatible with 700 MHz band tower sites, and 700/800 MHz band radios are not compatible with VHF band tower sites. Dual-band (VHF/700/800) radios will be able to connect to all MOSWIN sites. As a result, **grant funds will only be permitted for models of radios that are dual-band.**

For more information and instruction, refer to the "Radio Interoperability Guidelines" available online at <https://dps.mo.gov/dir/programs/cjle/jag.php>.

**NOTE: Agencies seeking any type of radio or radio-related accessory are encouraged to contact the Missouri Interoperability Center by phone at (855) 4-MOSWIN or by email at [moswin.sysadmin@dps.mo.gov](mailto:moswin.sysadmin@dps.mo.gov) to ensure the appropriate communication devices are purchased for the department's needs and location to the nearest MOSWIN tower and to ensure the appropriate administrative requirements are met as it relates to the MOSWIN. The Missouri Interoperability Center staff can also provide helpful information regarding the department's ability to access the MOSWIN and how to articulate such within the grant application.**
