

# Missouri Department of Public Safety

## Strategic Management Priorities

FY2026 Version 1.0

### Making a Safer Missouri

#### We are going to improve communication inside and out.

- Continue to support Operation Relentless Pursuit, a Safer Missouri Initiative, by fostering intelligence gathering and collaboration among law enforcement agencies to help locate and apprehend fugitive felons.
- The State Emergency Management Agency will create a live dashboard to allow real time data in an on-going event or disaster for internal and external stakeholders.
- The Office of Homeland Security will share internal and external communications to educate Missouri residents on cybersecurity risks and scams.
- Launch new Intranet sites for the consolidated DPS divisions.

#### We are going to improve our team.

- Utilize feedback from programs, like the State of the Workforce survey, to identify methods to improve the organization at all levels.
- Emphasize the culture of recognition that highlights team member's achievements that coincide with the agency's core values.
- Support team members in adopting approved technologies that simplify workflows and improve productivity.
- Encourage team members to engage in professional development that enhances both individual and agency success.

#### We are going to improve how we work with our stakeholders.

- Continue to promote the Missouri Blue Shield Program, a Safer Missouri Initiative, which highlights and rewards a community's partnership with law enforcement.
- The State Emergency Management Agency will support Missouri's preparedness and resiliency efforts by increasing the number of Community Organizations Active in Disasters (COADs) in the state, educating local government stakeholders on the important role COADs play in their community's preparedness and response.
- The Missouri Veteran's Commission will collaborate with other state and local agencies with the goal of increasing outreach and awareness for Veterans relating to federal, state and local benefits.
- Collect value-added stakeholder feedback through the Share MO program.
